

Advance Excel Training Programs Productivity & Efficiency

*"Designed
by Practitioners
For
Practitioners"*

Focuses on

**Practical & Creative
Applications**

The Reason Why Us!

An experience trainer with practical combination
of **Finance + Analysis + Excel Skills**

"The training is very useful thanks to our trainer who comes with super experience, both applied and theoretical. She is knowledgeable and very accommodating to our request. The class goes on well and fun to learn."

Offer **Powerful Tips & Tricks** to improve your
productivity and efficiency

"I can't explain how much Trainer has helped me going through the challenges. She is able to come out with immediate solution & powerful tips to solve my problem."

Learning Orientation focuses on **Real Life Work
Challenges**

"Thank you for sharing real-life case studies. I immediately put some of suggestions into practice and feel confident that the skills I learned will serve me well in my position."

Positive Directional and Approachable Learning
Climate

"Trainer is very patient and friendly. She always encourages and assure us that making mistakes help our learning."

This is not an IT program. It is a AT (Applied Technology) program that focuses on how to practically and creatively apply various techniques and functions learnt to easily solve difficult work challenges. After attending these training programs, you will be able to (i) Increase employees productivity & efficiency; (ii) Provide business solutions to interactive what-if analysis & data management through the powerful usage of Excel and PowerPoint.
